CAREER OBJECTIVE

Data Analyst with experience in MIS reporting, sales analytics, KPI reporting, Business insights, Performance Analysis, financial reporting, and business intelligence. Skilled in Power BI, SQL, Excel, Python, and Looker Studio for transforming raw data into actionable insights. Experienced in dashboard development, KPI reporting, and business performance analysis, Stakeholder Reporting to support data-driven decision-making.

CORE COMPETENCIES

Business Analysis & Reporting	KPI Monitoring & Performance Tracking	Cross-Functional Collaboration	Data-Driven Decision Making
Stakeholder Communication	Process Improvement & Automation	MIS & Dashboard Development	Financial & Sales Analytics

PROFESSIONAL EXPERIENCE

Charg | Executive, MIS

Nov 2025 – Present

- Analyzed sales performance across multiple regions and developed KPI dashboards used by management to monitor daily sales operations and Performance Analysis.
- Developed automated sales reporting processes using Excel and Power BI, reducing report preparation time by 40% and ensuring decision-ready outputs.
- Coordinate with the supply chain and sales teams to consolidate data, track KPIs, and maintain reporting accuracy across multiple departments.
- Conduct product-wise analysis and compile insights that support strategic decisions — communicating findings clearly to stakeholders.
- Generate organized records of sales operations data, managing sensitive business information with full discretion and professionalism.
- Proactively identify reporting gaps and take ownership of streamlining documentation workflows to reduce turnaround time.

Boardwalk Wealth | Junior Data Analyst

Jun 2025 – Oct 2025

- Developed 3 business-critical Google Sheet trackers (P&L, Capex, and Centralized Tracker) used by the finance team for reporting and decision-making.
- Generated stakeholder-ready financial reports and presentations, supporting the COO and finance leadership in department-wide reviews.
- Collaborated with cross-functional teams to streamline end-to-end data pipelines and ensure documentation accuracy.
- Handled confidential financial records and ensured all data was organized, accessible, and up-to-date for leadership.

ACADEMIC QUALIFICATION

B.Sc. in Computer Science & Engineering (CSE)

National Institute of Textile Engineering and Research
University of Dhaka Constituent
CGPA: 3.26 / 4.00
2020 – 2025

Higher Secondary Certificate – Science

Govt. Science School and College
GPA: 4.08 / 5.00
2017 – 2019

TECHNICAL SKILLS

Productivity & Collaboration

Google Workspace (Docs, Sheets, Slides), Microsoft Excel (Advanced), Microsoft Office Suite

Data & Programming

SQL (Joins, CTEs, Window Functions, Data Cleaning), Python (Basic), Data Cleaning, Data Visualization

Reporting & BI Tools

Power BI (DAX, Data Modeling, Dashboard Development), Looker Studio, Google Sheets

Soft Skills

Cross-Team Collaboration, Business Communication, Attention to Detail, Time Management

- Data Analysis with Excel Pivot Tables – 2025 ([Link](#))
- Basics of Business Analytics – 2025 ([Link](#))
- Basics of Strategic Analysis Models – 2025 ([Link](#))

KEY PROJECTS

Anwar Cement Sales Performance Dashboard – Power BI

- Built a multi-page interactive sales dashboard tracking 563M in total sales, 1M+ orders, and 53.59K average order value across dealers, locations, and product lines.
- Analyzed month-on-month sales trends (Jan–Nov), identifying peak months (March: 50M, October: 49.7M) and low periods (September: 41.3M) to support seasonal planning.
- Developed breakdowns by Location, Division, Sales Representative, and Top Dealers, enabling regional benchmarking and key account management decisions.
- Integrated dynamic slicers for Month, Division, and Product — allowing stakeholders to self-serve insights without manual reporting.

Shwapno Monthly Sales Dashboard – Power BI

- Built a monthly sales dashboard tracking 436.78M in total sales, 76.74M profit, and 267.49M units sold across multiple store types and divisions.
- Analyzed product-wise, division-wise, and category-wise performance, identifying Lifestyle as the highest-margin category (27.24%) and Consumables as a loss-making segment (-0.10%).
- Visualized Own vs Franchise store split to help management evaluate store model performance across Sylhet, Rangpur, and Rajshahi.

Hospital Management System Dashboard – Power BI ([Link](#))

- Developed an interactive Power BI dashboard analyzing 1,995 patient records, enabling identification of peak admission periods and department-level resource requirements.
- Identified a July/August admission peak for proactive staffing, revealed General Practice and Cardiology as highest-demand departments, and surfaced patient diversity data by race, age, and gender to support inclusive care decisions. Built with rigorous data cleaning, data modelling, and user-friendly layout design in Power BI

Website Analytics Dashboard – Power BI

- Developed an interactive dashboard tracking 688K page views, 6M sessions, 50.3% bounce rate, and 2:27 avg. session duration across 12 months.
- Identified a -18,398 (-3%) page view shortfall vs target, with Feb–Mar as the lowest-traffic period, supporting data-driven marketing decisions.
- Analyzed performance by browser, country, and session conversion — revealing Opera as the top session driver and India as the leading traffic source (0.21M).
- Tracked 68% converted vs 32% not converted sessions with dynamic slicers for Country, Device Type, Traffic Source, and Browser.

Management Service Report – Power BI ([Link](#))

- Built a service performance dashboard for customer operations. Detected declining response times in Q3, prompting staffing adjustments that improved customer retention.

Large Cargo Shipments & Logistics Analytics ([Link](#))

- Built an operations dashboard tracking shipment volumes, costs, and delays — identified that 18% of delays originated from a single route, enabling cost-saving rerouting decisions.
Demonstrated ability to research, compile, and present operational insights in formats directly useful for management decision-making.
